

Student Outreach Program in Namami Gange Project held at Jadavpur University

Jadavpur University buzzed with activity as Raidighi College's intrepid UG Geographers plunged into the Namami Gange Project. Armed with maps, notebooks, and an unyielding curiosity, they dove headfirst into the intricacies of river rejuvenation. Days were spent in workshops, delving into the complexities of water quality, pollution mitigation, and ecological restoration. Interactive sessions with renowned experts ignited passionate discussions, each question chipping away at the challenges facing the mighty Ganga.

Fieldwork was the beating heart of the experience. Armed with GPS devices and keen eyes, the Geographers scoured the banks of the Hooghly, meticulously documenting its state. From mapping erosion patterns to analyzing water samples, every observation added a vital piece to the puzzle. Data in hand, they returned to the labs, transforming raw facts into compelling presentations. Each chart and graph whispered a story of the river's health, urging for action and change.

The culmination of their efforts was a resounding success. Their research proposals, brimming with innovative ideas and practical solutions, impressed judges and fellow participants alike. Namami Gange became more than just a project; it was a springboard for the young Geographers, awakening a deep commitment to the river's future. Returning to Raidighi, they carried with them not just knowledge, but a burning desire to be agents of change, ensuring that the Ganga flows ever stronger, a testament to their dedication and unwavering resolve.
