Microbiology Students Gain Hands-on Experience at Jangal Para Industry

Six final-year microbiology students from Raidighi College embarked on a unique learning experience with an industrial visit to Jangal Para, West Bengal. This day-long excursion provided a valuable opportunity for the students to bridge the gap between theoretical knowledge and real-world applications.

Witnessing firsthand how the microscopic processes they study in the classroom translate into large-scale production for human needs proved to be an enriching experience. The students enthusiastically observed the industrial processes, gaining a deeper understanding of the practical applications of microbiology in various sectors. This visit served as a crucial complement to their academic studies, equipping them with valuable insights into the future career possibilities within the field.
