

Report on Observation of World Wetlands Day 2024

The Department of Geography, Raidighi College, observed World Wetlands Day on February 2, 2024, at the scenic Raidighi Eco Tourism Park. The event was organized to raise awareness about the importance of wetlands in sustaining ecosystems, biodiversity, and local livelihoods.

The program was graced by the presence of the Principal, Dr. Sasabindu Jana, and NAAC Steering Committee member, Dr. Arunima Biswas, who addressed the students and emphasized the critical role of wetlands in mitigating climate change and ensuring water security.

Dr. Jana highlighted the ecological and economic significance of wetlands, urging students to take an active role in their conservation. Dr. Biswas elaborated on the need for sustainable practices and community involvement in preserving these vital ecosystems.

The event included interactive sessions where students shared their perspectives on wetland preservation, followed by a guided tour of the Raidighi Eco Tourism Park to observe the rich biodiversity supported by the wetland environment. Faculty members provided insights into the flora and fauna specific to wetlands and discussed the threats posed by human activities and climate change.

The program concluded with a pledge by all attendees to contribute to wetland conservation and spread awareness in their communities. The active participation of students and faculty members made the event both educational and impactful.

This observance of World Wetlands Day reinforced the commitment of Raidighi College to environmental education and sustainable development, fostering a sense of responsibility among students towards conserving natural ecosystems.
